About

A player who joined [Metro City](#) around Session 3-4. And probably the laggiest player on the server. He sorta managed to join sessions, even though he met the void a couple of times. Mostly stayed around the closed off commune.

Appearance:

Wears a green hoodie and jeans, with a welding mask spray painted across it.

History

He and others lived on a floating dirt platform in the early times. He mostly farmed and filled the chest with food.
(Insert a bit more history here)
